CURRICULUM

Bachelor of Science in Mechatronics Engineering (BSMexE)

Academic Year 2018-2019 Reference CMOs: CMO No. 4 s. 2018 and CMO No. 20 s. 2013

Curriculum Description

Mechatronics Engineering deals with the branch of engineering that integrates available and emerging technologies with knowledge in mathematics, natural, social and applied sciences to conceptualize, design, and implement new, improved, or innovative mechatronics systems, devices, goods, services and processes.

Program Educational Objectives

The mechatronics engineering alumni three to five years after graduation shall:

- 1. Apply knowledge, skills and abilities in mechanical engineering, electrical engineering, electronics engineering, and computing in solving inter-disciplinary problems.
- 2. Work and lead competently, efficiently and effectively in multi-disciplinary teams to achieve design and/or project objectives.
- 3. Participate in lifelong learning to maintain professional, ethical and societal responsibilities.

Student Outcomes

The following skills, knowledge, and behaviors are expected to be attained by students as they progress through the program:

- a. Ability to apply knowledge of mathematics and science to solve engineering problems.
- b. Ability to design and conduct experiments, as well as to analyze and interpret data.
- c. Ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability, in accordance with standards.
- d. Ability to function on multidisciplinary teams.
- e. Ability to identify, formulate, and solve engineering problems.
- f. Understanding of professional and ethical responsibility.
- g. Ability to communicate effectively.
- h. Broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context.
- i. Recognition of the need for, and an ability to engage in life-long learning.
- j. Knowledge of contemporary issues.
- k. Ability to use techniques, skills, and modern engineering tools necessary for engineering practice.
- 1. Knowledge and understanding of engineering and management principles as a member and leader in a team, to manage projects and in multidisciplinary environments.
