

# Republic of the Philippines **BATANGAS STATE UNIVERSITY**

## BatStateU Alangilan Alangilan Batangas City

#### **CURRICULUM**

#### **Bachelor of Science in Metallurgical Engineering (BSMetE)**

Academic Year: 2021-2022

Reference CMOs: CMO No. 100 s. 2017, CMO No. 4 s. 2018 and CMO No. 20 s. 2013

#### **Curriculum Description**

Metallurgical Engineering is a profession that involves the teaching and practice of physical and/or chemical processing and treatment of metals from ores to achieve properties required for their application. It is also the study of the properties of metallic materials by altering the microscopic structure with alloying additions and special treatments, and designing and processing techniques to transform these metals into useful shapes, such as billets, ingots, bars and slabs. In the mining and manufacturing industries, metallurgical engineers apply their knowledge of metals to solve complex problems. They deal with all aspects of the production and application of metals and their alloys. This means that they must learn about each stage of the metal-making process, from mining and extraction through alloy formation and the use of metals in finished products.

Graduates of this program are in academic, industrial, and government sectors. Job functions include research, teaching, process engineering and optimization and production of metallic materials and related products. The program includes core courses, specialization courses, elective courses, and plant design and research. The program will adopt outcome-based education (OBE) framework with flipped classroom and other blended learning pedagogies.

#### **Program Educational Objectives of Metallurgical Engineering**

The Metallurgical Engineering alumni three to five years after graduation shall:

- 1. **Specialist.** Practiced as specialist in solving complex metallurgical engineering problems leading to improvements and innovations, while taking into consideration the environmental, social, and economical requirements.
- 2. **Professionalism and Leadership.** Assumed leadership position in industry, academe, government, or private sector with consideration to social and ethical responsibility.
- 3. **Lifelong Learning.** Engaged in lifelong learning through further studies, research, certifications, promotions, and other personal and professional development activities.

#### **Institutional Graduate Attributes**

The student should achieve at least 75% for each IGA upon graduation.

- 1. **Knowledge Competence.** Demonstrate a mastery of the fundamental knowledge and skills required for functioning effectively as a professional in the discipline, and an ability to integrate and apply them effectively to practice in the workplace.
- 2. **Creativity and Innovation.** Experiment with new approaches, challenge existing knowledge boundaries and design novel solutions to solve problems.

- 3. **Critical and Systems Thinking.** Identify, define, and deal with complex problems pertinent to the future professional practice or daily life through logical, analytical and critical thinking.
- 4. **Communication.** Communicate effectively (both orally and in writing) with a wide range of audiences, across a range of professional and personal contexts, in English and Pilipino.
- 5. **Lifelong Learning.** Identify own learning needs for professional or personal development; demonstrate an eagerness to take up opportunities for learning new things as well as the ability to learn effectively on their own.
- 6. **Leadership, teamwork, and Interpersonal Skills.** Function effectively both as a leader and as a member of a team; motivate and lead a team to work towards goal; work collaboratively with other team members; as well as connect and interact socially and effectively with diverse culture.
- 7. **Global Outlook.** Demonstrate an awareness and understanding of global issues and willingness to work, interact effectively and show sensitivity to cultural diversity.
- 8. **Social and National Responsibility.** Demonstrate an awareness of their social and national responsibility; engage in activities that contribute to the betterment of the society; and behave ethically and responsibly in social, professional and work environments.

#### **Student Outcomes**

The following skills, knowledge, and behaviors are expected to be attained by students as they progress through the program:

- 1. **Discipline Knowledge.** Ability to apply mathematics, sciences and principles of engineering to solve complex metallurgical engineering problems;
- 2. **Investigation.** Ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions;
- 3. **Design/Development of Solutions.** Design solution, system, components, processes, exhibiting improvements/innovations, that meet specified needs with appropriate consideration for public health and safety, cultural, societal, economical, ethical, environmental and sustainability issues.
- 4. **Leadership and Teamwork.** Function effectively as a member of a leader on a diverse team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
- 5. **Problem Analysis.** Identify, formulate, and solve complex metallurgical engineering problems by applying principles of engineering, science, and mathematics;
- 6. **Ethics and Professionalism.** Apply ethical principles and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, environmental, and societal contexts.
- 7. **Communication.** Communicate effectively on complex engineering activities with the community, and the society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions:

- 8. **Environment and Sustainability.** Recognize the impact of professional engineering solutions in societal, global, and environmental contexts and demonstrate knowledge of and need for sustainable development;
- 9. **Lifelong Learning.** Recognize the need for, and ability to engage in independent and life-long learning in the broadest context of technological change.
- 10. **The Engineer and Society.** Apply reasoning based on contextual knowledge to assess societal, health, safety, legal, cultural, contemporary issues, and the consequent responsibilities relevant to professional engineering practices.
- 11. **Modern Tool Usage.** Apply appropriate techniques, skills, and modern engineering and IT tools to complex metallurgical engineering activities;
- 12. **Project Management and Finance.** Demonstrate knowledge and understanding of engineering management and financial principles as member or a leader of a team to manage projects in multidisciplinary settings, and identify opportunities of entrepreneurship.
- 13. **Social and National Responsibility.** Apply acquired metallurgical engineering knowledge and skills in addressing community problems that contributes to national development.

## **CURRICULUM COMPONENTS**

Classification/Field/Course	Credit		ber of s/Week
	Units	Lec	Lab
TECHNICAL COURSES			
A. Mathematics			
Differential Calculus	3	3	0
Integral Calculus	3	3	0
Differential Equations	3	3	0
Engineering Data Analysis	3	3	0
Calculus 3	2	2	0
	ototal 14	14	0
B. Natural/Physical Sciences			
General Chemistry	4	3	3
Physics 1	4	3	3
Modern Biology	3	2	3
Principles of Geology	2	2	0
	ototal 13	10	9
C. Basic Engineering Sciences			
Computer Programming 1	1	0	3
Engineering Drawing	1	0	3
Statics of Rigid Bodies	3	3	0
Dynamics of Rigid Bodies	2	2	0
Mechanics of Deformable Bodies	3	3	0
Computer-Aided Design	1	0	3
Environmental Science and Engineering	3	3	0
Engineering Management	2	2	0
Technopreneurship	3	3	0
Engineering Economics	3	3	0
Research Methods	3	3	0
Material Science and Engineering	3	3	0
Introduction to Engineering	1	0	3
	ototal 29	25	12
D. Allied Courses			
Basic Electrical Engineering	3	2	3
Analytical Chemistry	4	2	6
Principles of Mining	3	3	0
Fluid Mechanics	3	3	0
	ototal 13	10	9
E. Professional Courses			_
Introduction to Metallurgical Engineering	1	1	0
Mineral Processing 1	4	3	3
Workshop Theory and Practice	1	0	3
Mineral Processing 2	5	3	6
Ore Microscopy and Mineralogy	3	2	3
Metallurgical Physical Chemistry	4	3	3
Metallurgical Analysis	3	1	6
Physical Metallurgy 1	4	3	3
Physical Metallurgy 2	3	2	3

Grand Total	189	153	96
