

Bachelor of Science in Interior Design (BSID)

Program Educational Objectives of Interior Design

The interior design alumni three to five years after graduation shall:

1. Successfully demonstrate critical and analytical thinking of principles, philosophies and theoretical frameworks of the Interior Design discipline.
2. Foster a strong sense of nationalism arising from the realization of the role of interior design in the nation's historical and cultural development.
3. Adhere to professional, moral and ethical standards in the practice of Interior Design.

Student Outcomes

The following skills, knowledge, and behavior are expected to be attained by students as they progress through the program:

- a. Ability to formulate and implement design concepts, strategies and/or approaches using new technology in Interior Design.
- b. Ability to integrate theories, current issues and design philosophies to Interior Design problems.
- c. Ability to demonstrate knowledge of history of arts, period styles, materials of decoration, furniture design, building construction and color studies
- d. Ability to effectively function and assimilate within a collaborative framework in multidisciplinary teams and taskforce
- e. Effectively convey and communicate through visual, oral, written and virtual communication whether interpersonally through mass media or through electronic means or advance ICT technologies
- f. Ability to understand, apply and practice ethical, professional values and responsibilities.
- g. Ability to perform tasks according to Interior Design global standards
- h. Ability to exhibit sensitivity to cultural preservations, social environmental issues and advocates
