## TBI Five-year Focus Group Discussion

May 10-11, UP Diliman – CTI project staff, together with other TBI managers and representatives from the country's different agencies and organization, attended the Technology Business Incubator (TBI) five-year Roadmapping Focus Group Discussion.

The two-day workshop focused on the different activities for the achievement of the five-year roadmap of all the TBIs nationwide. It has helped identify current status, future challenges, and individual recommendations of the stakeholders involved in the national road mapping project.

Part of the workshop were segments of discussion such as the Presentation of the Summarized Strategic Goals, and the Formulation of Strategic Objectives through Mind Mapping Exercise, featuring speakers Ms. Russell M. Pili, Chief Science Research Specialist of RITTD PCIEERD, and Dr. Sheryll Satorre of DOST PCIEERD.

During the workshop, the BatStateU CTI staff were able to gain essential information which were beneficial for the ongoing establishment of the BatStateU TBI. Also, collaboration and linkages were established during the said activity in support to achieving the goals of the University's TBI.
