BatStateU VP for Research, Development and Extension Services Engr. Albertson D. Amante, together with selected research center heads and project staff, visited different technology business incubators and research centers in Singapore from July 31 to August 4.

The study visit paved the way towards knowledge exchange, access to new information on current trends and practices on research and innovation, and partnership opportunities and linkages with the visited institutions.
The Singapore Polytechnic Innovation Office (SPINOFF) is the Entrepreneurship Centre at Singapore Polytechnic, an institution of higher learning in Singapore.

SPINOFF is in charge of all entrepreneurship-related programs and activities at Singapore Polytechnic, providing trainings and funds for creating technology businesses.

The Center for IT Innovation (CITI) in Nanyang Polytechnic (NYP), School of Information Technology, was established as a platform to provide an impetus towards several key objectives, of which are focused on CITI as a launch pad for major industrial collaborations and cutting edge R & D projects.

CITI establishes itself as a multi-disciplinary hub that promotes vibrancy and cohesion by enabling students from the various IT diplomas to work together on industrial and in-house projects. It also acts as an incubation zone for creative ideas to be generated and conceptualized. In the process of conceptualization, cutting-edge technologies are being employed.

Leave a Nest

Leave a Nest Singapore is the longest established overseas base which is highly active in South East Asia region. This headquarter undertakes a new journey to gather new talents and partners in the Asia Pacific (APac) region for bringing about new innovations through science and technology.

According to Leave a Nest Singapore’s Managing Director Dr. Kihoko Tokue, the company takes pride in training local talents by recruiting interns from the Universities. They also offer training of interns both locally and overseas, according to her.

Dr. Tokue adds that they work very closely with University researchers for them to apply their research output and technology to create new business or collaborate with industries.
