Updates on BatStateU Research Centers
ACTION Center spearheads Basic ICS Training Level 1 in BatStateU Main I

The Adaptive Capacity Building and Technology Innovation for Occupational Safety and Natural Disaster (ACTION) Center in collaboration with the Office of the Civil Defense led a three-day Basic Incident Command System Training in BatStateU Pablo Borbon Main I. Participants of the training were the university officials from BatStateU Main I and II campuses.

The training aimed to help its participants obtain the essential knowledge and skills needed for the application of basic concepts and principles of ICS to tactically respond to disaster-stricken situations.
